PROFESSIONAL EXPERIENCE

HEXAWARE TECHNOLOGIES

Lead Engineer | October 2025 - Present
- Led development on Backbase client project for Eastern, focusing on Retail Banking, Digital Assist, Identity, and Onboarding modules
- Implemented new features and enhancements using Angular within the Backbase platform
- Successfully upgraded projects to stable Backbase versions, ensuring compatibility and optimal functionality
- Collaborated with cross-functional teams to deliver scalable and maintainable solutions

Senior Frontend Developer | July 2023 - October 2025
- Developed and maintained Backbase client projects for BECU and Kapitus, ensuring high-quality deliverables
- Ensured full ADA (Americans with Disabilities Act) compliance for the BECU Onboarding Application
- Created fully responsive applications optimized for web, tablet, and mobile devices
- Worked closely with designers and backend teams to deliver seamless, user-friendly solutions
- Developed features for Kapitus Onboarding and Digital Assist (Employee App)
- Managed application deployments across development, testing, staging, and production environments
- Fixed UI bugs, improved performance, and maintained code quality through regular reviews

SIMBIOTIK TECHNOLOGIES SDN. BHD.

Senior Software Developer | July 2021 - July 2023
- Led a frontend team to deliver high-quality, bug-free solutions to clients
- Worked on the Toyota DMS (Dealer Management System) project, leveraging extensive Angular expertise
- Managed JIRA tickets, sprint planning, and task tracking to ensure timely project delivery
- Collaborated with Business Analysts for requirement gathering and clarification
- Created frontend flow documents and coordinated client-side approvals

CODAL INC.

Software Engineer | November 2020 - July 2021
- Specialized in frontend development using Angular and JavaScript
- Implemented API integrations and worked with third-party APIs
- Enhanced functionality and improved user interactions using jQuery
- Contributed to Angular-based projects with a focus on scalable and maintainable UI development

GREEN APEX TECHNOLABS

Frontend Developer | October 2017 - October 2020
- Worked as a Frontend Developer and MEAN Stack Developer across multiple domains
- Gained experience in ERP, Campaign Management, Event Management, Hospitality Rental, and Appointment Booking systems
- Contributed to projects built with Angular (version 2+)
- Developed and maintained small-scale projects using Node.js and Express.js

NKONNECT INFOWAY

Web Developer | May 2016 - October 2017
- Developed and maintained Manpasand Beverages ERP system
- Created Python scripts for web scraping to collect and process data efficiently
- Worked on AngularJS-based projects focusing on frontend development and user experience

KEY PROJECTS

DMS - Toyota Dealer Management System
- Comprehensive system to manage brands, outlets, users, permissions, vehicle models, leads, and promo codes
- Enabled users to create quotations, invoices, and access information via the mobile application
- Implemented role-based permissions and customer feedback management

Scraye - Home Rental Platform
- End-to-end platform to make renting homes simple, fast, and transparent for agents, landlords, and tenants
- Features include property profiles, digital admin completion, and comprehensive management services

MH-UI - Medical Appointment Booking

- An online medical care appointment booking service integrating medical practice information and doctor schedules in a central location

POC PROJECTS & INNOVATIONS

Vector AI - PDF Question Answering with Vector Search

- Full-stack application for semantic search and question-answering on PDF documents featuring Node.js REST API with RAG (Retrieval-Augmented Generation) and modern Angular frontend

DevCommit CLI

- devcommit is an AI-powered Conventional Commit message generator that understands your code changes.

Mdify

- Transform unformatted text into structured Markdown instantly using Groq, Gemini, and OpenAI. Features a real-time preview and export.

CodeQ - Codebase Q&A Tool

- An AI-powered tool allowing users to upload any codebase (GitHub repo or ZIP file) and ask questions in plain English, providing accurate answers with precise file and line references

Smart FAQ Generator

- Modern AI-powered FAQ generator that automatically creates intelligent FAQs from text content or uploaded documents

WriteAI - AI Writing Assistant

- Grammarly-like AI Writing Assistant POC built with Angular 17 and Node.js/Express, supporting multiple AI providers, including free options

Angular Moment Timezone POC

- Demonstration application for working with dates according tothe system timezone and the supported time zones list

EDUCATION

Master of Computer Applications (MCA)

Gujarat Technological University, Gandhinagar | 2014 - 2016

Bachelor of Computer Applications (BCA)

Saurashtra University, Rajkot | 2011 - 2014

CERTIFICATIONS

- Artificial Intelligence A-Z 2024: Build 5 AI (incl. ChatGPT) - Udemy, January 2024
- ChatGPT Complete Guide: Learn Midjourney, ChatGPT 4 & More - Udemy, January 2024
- Reactive Angular Course (with RxJs, Angular 17) - Udemy, December 2023
